

CA-64 ADR-MOD

An addressing module for converting traditional detectors for an alarm system equipped with a relay output into detectors connected to an addressable control panel. A small enclosure of the addressing module makes it possible to install it even in detectors equipped with small-sized enclosures.

- converts standard (NO, NC) detector into addressable detector
- installs inside detector enclosure
- compatible with **INT-ADR**, **CA-64 ADR** addressable bus module

Current consumption

1,2 mA
